

Primeros pasos con Spring Framework

Sergio Aragón

Creamos un proyecto de tipo Spring Starter Project, Java versión 8, con las dependencias Spring Boot DevTools, Thymeleaf y Spring Web.

Creamos el paquete CONTROLLER donde alojaremos la clase HelloWorldController.java.

Copiamos el código teniendo en cuenta el import del paquete en el código.

Pulsamos Run As -> Spring Boot App y en la consola deberíamos ver como se levanta el servidor Tomcat.

```
10 SpringApplication.run(Ud23GavenApplication.class, args);
11
